CAPITAL is a collaborative capacity building project carried out by the European Union. It brings together experts and organisations working to develop a training and e-learning programme in the field of transport, focusing on the promotion of sustainable, inclusive and efficient transport systems.

**OUR AIM**

The aim of the project is to develop a training and e-learning programme on topics such as transport in urban areas, sustainable transport, and the implementation of European Union legislation. The programme will be delivered in both face-to-face training and online format.

**FACE-TO-FACE TRAINING**

The programme will include workshops, seminars, and hands-on training sessions. Participants will have the opportunity to network with experts from different fields, share knowledge, and learn from real-life examples.

**E-LEARNING PLATFORM**

A comprehensive e-learning platform will be developed to provide accessible and flexible training material. The platform will include interactive modules, videos, and quizzes to enhance the learning experience. It will be available in multiple languages to cater to diverse learners.

**FACTS & FIGURES**

- More than 30,000 people are involved in the transport sector in Europe.
- Over 15 million vehicles are used for transport purposes daily.
- The European Union aims to reduce greenhouse gas emissions by 40% by 2030.

**CONSORTIUM**

The consortium comprises experts from diverse sectors including transport, education, and sustainable development. Key partners include national and regional authorities, universities, NGOs, and industry stakeholders.
