

CAPITAL

What is CAPITAL?

CAPITAL is an EU co-funded project aiming to design and deliver a collaborative capacity-building programme for training and educating practitioners in the field of Cooperative Intelligent Transport Systems deployment.

The CAPITAL project will develop an open platform offering training modules to the public and private sector and hands-on training involving 6 European cities. The platform also aims to raise awareness and to organise liaison activities focusing on the benefits of (C)ITS services.

Key objectives of CAPITAL

Create a platform for practitioners in the public and private sectors in the field of (C)ITS deployment by establishing synergies with existing regional, European and international activities.

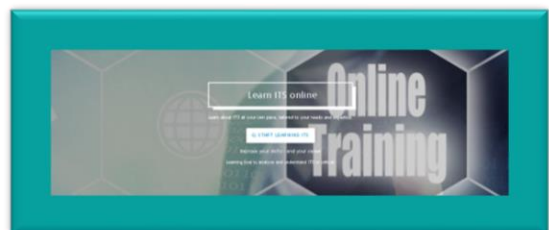

Develop an ITS transferability handbook featuring case studies of how best to support the decision making process for deploying C-ITS.

Develop a user awareness strategy and promote dissemination and awareness of the collaborative capacity-building programme to other ITS stakeholders.

What's on the CAPITAL website?

Check out the CAPITAL website <http://capital-project.its-elearning.eu> to find more information on the following...

- Info about the different collaborative capacity-building programmes
- Open platform offering ITS training modules (under construction)
